Dear Parent or Guardian:

Lake Orion Community Schools utilizes an Integrated Pest Management (IPM) approach to control pests. IPM is a pest management system that utilizes all suitable techniques in a total pest management system with the interest of preventing pests from reaching unacceptable levels or to reduce an existing population to an acceptable level. Pest management techniques emphasize pest exclusion and biological controls; however, as with most pest control programs, pesticides are occasionally applied.

You have the right to be informed prior to any application of an insecticide, fungicide or herbicide made to the school grounds or buildings during the school year. In certain emergencies, such as an infestation of stinging insects, pesticides may be applied without prior notice to prevent injury to students, but you will be notified following any application. If you would like prior notification, please complete the information below and email to susan.tumey@lok12.org or mail to Lake Orion Community Schools at the address at the top of this form.

Prior Notification Request for _____ (School Year)

Parent/Guardian's Name: _____

Student's Name: _____

Home Address: _____
