

Our Hearts are in Math

February is Math Month at Paint Creek! This year, we are going to change our math challenge up a little bit. Each week, your family will be given a math challenge to complete at home. While completing that challenge, take a picture of your family holding the back side of this page, upload it to social media (FB or Twitter), and use the hash tag #OurHeartsAreInMath. Once you have uploaded your photo, your child(ren) will be entered for a chance to win a prize and have his/her name announced on the news show. If you are not using social media, feel free to email a picture of your family completing the math challenge to Mrs. Veeder (dana.veeder@lok12.org), and your child(ren) will be entered into the weekly drawing.

Pictures are due Fridays by noon. Here are the weekly challenges:

February 3-7: COOKING – there is SO much math in cooking! Get in the kitchen with your family and make your favorite dish. Breakfast, lunch, or dinner, there is always math to be found in the kitchen.

February 10-14: BUILDING – grab your screw drivers, hammers, and nails, it's time to find the math in building/creating. Have your family build/create something. Rulers and tape measurers are a great way to incorporate math into building.

February 17-21: GAME NIGHT – well, it can be day or night. It's always fun to sit around the table and play your favorite card, board, or dice game. Notice all the math around you as you have some friendly competition with your family.

February 24-28: REAL WORLD MATH – there is always MATH around us. Take a picture of you and your family noticing all of the math in our every day lives. Grocery stores, movies, sports fields... math is EVERYWHERE!!!

Remember, this month is ALL about MATH!!!

Have fun with your family, keep that math talk flowing, and don't forget to smile. #OurHeartsAreInMath
